

## Welcome to Camas Periodontics!

---

We want your experience with us to be as enjoyable as possible. Because of this we have added services to support you in your treatment:

- ⊗ Your first visit to our office is an examination. *The charge will be \$145-\$200. This fee is expected in full at the time of the exam if you do not have insurance.*
- ⊗ We will contact your general dentist and have them email all current x-rays. ***If they do not have current x-rays or did not send them in time for your appointment, we may need to take one or more x-rays to have proper documentation for billing your insurance. Your plan may or may not cover these x-rays, please contact them directly for coverage details.***
- ⊗ For treatment that may have coverage limitations, a predetermination of benefits can be run through your insurance company prior to receiving treatment. This is a courtesy provided upon the patient's request.
- ⊗ For insurance that will not pay us directly or is unable to be verified, we will collect in full for services. Should insurance make payment, you will be reimbursed.
- ⊗ No interest 12-month financial plans are available through Care Credit for qualifying treatments. We do not offer "in house financing" as all payment is due in full at time of service.
- ⊗ We offer Oral sedation as an option to help lower anxiety during treatment. All treatment payments are made one week prior to treatment, which secures your reserved appointment and leaves fewer details to work through when you arrive for treatment.

Patient education is a priority to us. If there is something you don't understand, please ask! We want you to feel empowered to make good decisions about your oral health care.

We believe in long-term health and wellness. With this goal in mind, we also provide the highest quality materials and laboratories for your treatment. We hope you will be more than satisfied with our services.

Welcome aboard!

*-All of us at Camas Periodontics*
